

Stay Alive Don't Lose Control

Come to this important presentation on Loss of Control (LOC), our guest speakers will explore some of the factors that can lead to LOC and will provide some practical steps that can be taken by pilots to help avoid LOC. We will also be discussing airport operations which can often be a challenging environment, and can even pose a collision danger in the air or on the ground when pilots don't follow the recommended procedures. We will review regulations and recommended procedures when operating at airports, to help make us safer pilots. Please click on the link below to see more details and to register for this event! Seating is limited!

Directions: Please see map link for directions, seminar is in operations building conference room. Also see map link in Additional Information for a pictorial map.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
